

Preliminaries

Moodle

Slides, exercises and announcements will be provided in [this moodle course](#) (PW: theeffect)

Lecture

Christoph Hanck (christoph.hanck@vwl.uni-due.de)

Thursdays and Fridays from 10:00 - 14:00 in room R12 R06 A48 (until May 19th)

Tutorials

Lennard Maßmann (lennard.massmann@uni-due.de), Martin Arnold (martin.arnold@vwl.uni-due.de)

May 11th, 12th, and 19th, 14:00 - 18:00 in room R12 R06 A48

May 25th/26th and June 1st/2nd, 10:00 - 14:00 in room R12 R06 A48

Datacamp

- We are pleased to offer you the opportunity to improve your skills in statistical programming during this semester on [Datacamp](#)!
- This offer is *optional*.

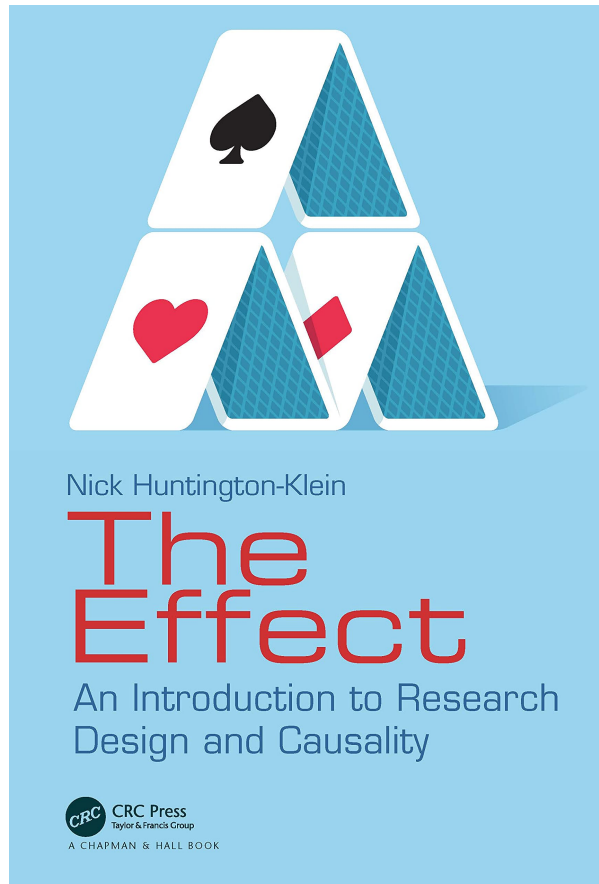

During the semester we will recommend courses that we feel are beneficial for revisiting and/or expanding on the R related material.

- You are welcome to take other courses as well—you have access to the entire catalog for free!
- Please register [in our group](#) with your @stud.uni-due.de mail address.

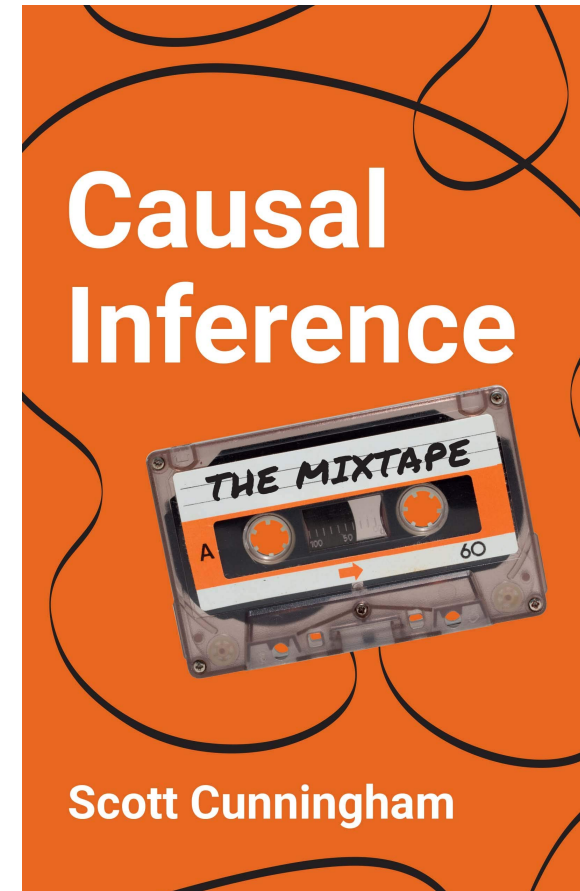

Literature (click cover for free Gitbook version)

The slides closely follow the exposition in *The Effect* by Nick Huntington-Klein.

Assessment

- Deviating from the info on the [faculty page](#), examinations will be *oral*.

You will present a (R-based) solution to a small case study assignment and answer further questions on topics covered in both lectures and tutorials in a subsequent discussion (40 minutes total).

- Tentative examination dates are July 20th and September 21st. Please see the [faculty page](#) for updates.
- Please note that you need to register for the exams during the regular registration period via HISinOne
